Plastic pollution is damaging our environment rapidly. Plastic material is hard to dispose of and contributes to major pollution on Earth. To create awareness among students intensive camp was organized on our campus with a global concern. With the increasing use of plastic

bags, utensils, and furniture, the amount of plastic waste has gone up. It is time we must take this problem seriously and work towards eradicating it.

Plastic plates, bags, spoons, glasses, and Plastic covers are readily available in the market. These are economical and easy to use. People prefer using these use-and-throw utensils during gatherings and parties on Beaches as it shuns the hassle of clearing and cleaning

the utensils later. All they need to do is to gather these and throw them away. However, little do they realize that this waste is not disposed off so easily. It continues to remain in the environment and harm us adversely.
