A one-day awareness program on **“Beat Plastic Pollution”** was organized by **NSS & RRC Cells of Arts and Science** on **09th June 2023** at Mamallapuram Beach. The program was inaugurated by **Dr. Nazeema T H** Director, School of Arts and Science, AV Campus, Paiyanoor at 10:30 a.m. Students were eagerly participated. This campaign mainly organized & created awareness by our college students and faculty members to be not get affected the plastic pollution. **Mr. R. Lenin, NSS Program Officer, Mr. R. Karthick Swaminathan, NSS Co-coordinator and Mr. P. Sadavel, RRC coordinator** were jointly Organized this Program.

Plastic pollution is damaging our environment rapidly. Waste plastic material is hard to dispose of and contributes to major pollution on earth especially in Beach. This has become a cause of global concern. The increasing use of plastic bags, utensils and furniture, the amount

of plastic waste has also gone up and so has the plastic pollution. It is time we must take this problem seriously and work towards eradicating it.

Plastic plates, bags, spoons, glasses and Plastic covers are readily available in the market. These are economical and easy to use. People prefer using these use-and-throw utensils during gatherings and parties in Beaches as it shuns the hassle of clearing and cleaning the utensils later. All they need to do

is to gather these and throw them away. However, little do they realize that this waste is not disposed off so easily. It continues to remain in the environment and harm us adversely.

Not just plastic utensils and carry bags, furniture and various other things made out of plastic are also used extensively world over. It is high time we must realize the harmful effects of

plastic pollution and contribute our bit towards bringing it down.

This event will not only carry the message of “**Beat Plastic Pollution**” but Plastic pollution, caused due to plastic waste, has reached alarming heights and is increasing rapidly with every passing day. It has become a cause of global concern as it is destroying our

beautiful Beach and having negative repercussions on all kinds of living beings.

It is time for us to stand united to fight this evil called plastic pollution. If each one of us follows the ways to beat plastic pollution shared here then we can certainly bring down the pollution level to a large extent.
